

“Learning is a treasure that will follow its owner everywhere.”

Chinese proverb

Throughout Key Stage 3 students encounter a broad and balanced curriculum which both inspires and supports them. Our Key Stage 3 is about students acquiring the knowledge and skills they need to flourish. The curriculum provides students with a wide range of opportunities to enrich their learning and with everything they need to succeed at Key Stage 4 and beyond. While studying an exciting blend of eighteen subjects our students:

- Grow in cultural capital through a wide variety of learning experiences in subjects ranging from Art and Music to Drama and Latin
- Engage with content and develop skills relevant to their own social and cultural context both locally and as global citizens
- Develop a thirst for knowledge, a passion for learning, and an academic skillset and knowledge-base that fully prepares them for the next stage in their learning journey
- Develop as highly competent written and verbal communicators
- Encounter a range of enrichment opportunities that both complement learning and deepen their social awareness
